

Study program	Level of the study program		Second cycle	
	Study program name		Physics Education	
Course name	PHYSICS EDUCATION III			
Course ID	Semester	Course status	ECTS credits	L+E
PED9611	III	MANDATORY	6	3+2
Lecturer				
Aims and intended learning outcomes	<p>The aim of this course is to further develop students' understanding about didactical specifics of learning and teaching mechanics and thermodynamics at the level of primary and secondary school.</p> <p>Intended learning outcomes:</p> <ol style="list-style-type: none"> 1. Describe common students' difficulties in learning mechanics and thermodynamics. 2. Identify potential sources of students' difficulties in learning mechanics and thermodynamics. 3. Identify and/or create approaches to overcoming students' difficulties in learning mechanics and thermodynamics. 4. Solve challenging (conceptual and quantitative) physics problems. 			
Course content				
<p>Learning and teaching about kinematics of one-dimensional motion. Learning and teaching about kinematics of two-dimensional motion. Learning and teaching about the concept of force and Newton's laws of motion. Learning and teaching about applications of Newton's laws of motion. Learning and teaching about circular motion and the concept of gravity. Learning and teaching about rotational motion, static equilibrium and elasticity. Learning and teaching about momentum. Learning and teaching about energy, work and power. Learning and teaching about the energy concept in various contexts. Learning and teaching about heat phenomena. Learning and teaching about fluids. Learning and teaching about the concept of oscillation. Learning and teaching about the wave concept. Learning and teaching about superposition of waves and standing waves.</p>				
Student workload (hours)		Grading		
Lectures and Exercises	75	Assessment method	Points	
Exam preparation	50	Partial exam	40	
Assignments	20	Seminar paper	20	
Other	5	Final exam	40	
Total	150			
		Total	100	
Literature
